Notable History

Prairie View A&M   Graduating May 2016

3.9 GPA - Working towards Bachelors in Computer Science

While at Prairie View I've held a few student employment positions; currently I'm working to create a web IDE for a cloud based image processor with the Cloud Computing Research Group.

L3 Communications   Spring & Summer of 2013

Software Development Internship

Wrote the web interface for software that tests the on-board computer of the Orion Multi-Purpose Crew Vehicle.

Burgess Specialty Fabricating   2010 - 2014

Information Technology Administrator

Upgraded all clients and virtualized on site servers. As a fabrication shop they have a variety of CNC machines to network. Created an extensive internal documentation wiki.

Sidtek, L.L.C.   2003 - 2008

Head Computer Repair Technician

The most profound lesson learned while working here is that I enjoy helping people more than fixing computer problems.

United States Marine Corps   1998 - 2003

Sergeant - Nuclear, Biological, and Chemical Warfare Defense Specialist

After high school I wasn't ready for college and found myself in the service. Much of my time was spent with administrative work, warehouse management, and teaching other Marines how to survive in contaminated environments.
